The Company Secretary informed the meeting that the reports of board of directors and the Company's operating results for 2015 with such details as set out in the 2015 Annual Report were submitted to the shareholders in advance. However, the material parts thereof were, in summary, as follows:

PICO Group has created an incessant success under the core competency. For instance, we won the Gold Award in the B2B Agency of the Year category at the Marketing Magazine's Agency of the Year Awards 2015. This has proved our expertise in thinking, creating, strategizing and presenting the high-potential marketing works to our Clients.

PICO Group has and always been conducting the businesses with the "Build Together" philosophy to drive our Company to the next level, with a stronger focus on Our People and Our Unity for year 2016.

For Pico (Thailand), we have developed our business strategies into two directions: Core Competency Strategy and Knowledge Communication Strategy

The Core Competency Strategy: We are proud to be a part of our Clients' success in the past year across industries, including automobile; food, beverages and energy; telecommunications; and fundamental economy industries.

1) Firstly, prominent examples from the automobile industry are the 31st Thailand International Motor Expo and the 36th Bangkok International Motor Show where we managed, designed and constructed the exhibition booths for various renowned automobile manufacturers; and the world's first launch of a new automobile model in Thailand where we organized the whole event. The total revenue from this industry was 423 million THB, increased by 36% from the previous year.

2) Secondly, prominent examples from the food, beverages and energy industry are 12th THAIFEX World of Food Asia, a global-scale food and beverage expo, where we designed and constructed standardized booths and pavilions for many leading brands, and the Environment and Energy Learning Center where we managed, designed and constructed. The total revenue from this industry was 168 million THB, increased by 73% from the previous year.

3) Thirdly, a prominent example from the telecommunications industry is the ITU Telecom World 2015, an international conference and world's telecom technology expo, where we managed, constructed and organized the whole event. The total revenue from this industry was 47 million THB, increased by 11% from the previous year.

4) Fourthly, a prominent example from the fundamental economy industry is Thailand Industry Expo 2015 where we managed, designed and constructed exhibition booths and organized activities. Thailand Industry Expo has been held for two consecutive years and developed into an annual event of Thailand's Ministry of Industry. It is our great pride to have earned the trust from the governmental sector and become part of the event creation and management that adds value to promoting the fundamental economy and industry of Thailand. The total revenue from this industry was 43 million THB, which had no significant change from the previous year.

Knowledge Communication Strategy: PICO (Thailand) has exhibited and proved to be a good example of the integrated services combining "communication expertise" with "integrated knowledge" with a clear positioning as

a Knowledge Agent. This strategy can be categorized into two: one is related to the core businesses and the other is related to the new businesses being developed.

1) The Knowledge Communication Strategy related to our core businesses includes the management of knowledge-elevation exhibitions. Last year, we created and managed National Science and Technology Fair 2015 and created more museum works. Our Company has also acquired 2010 Media Company Limited in order to enhance our business strength and advance our capability in terms of museum creation.

2) The Knowledge Communication Strategy related to the new businesses has, in fact, been developed together with the Knowledge Communication Strategy from the very beginning, known as “Education Communications.” We have spent over 8 years in fortifying our knowledge and potential in digital media services. Two of which are “EDUCA,” the annual congress for teacher professional development, and “Teachers as Learners,” a digital media for teacher professional development. These great works have created the social awareness and clearly communicated our standpoint and high competence in such area. Consequently, the Company has continually providing digital media services to the governmental sector. This includes the third consecutive year of “Mahidol Channel,” a new education media perfectly combining education and entertainment that communicates with mass audience via multiple platforms such as television, website, Facebook, YouTube and mobile phone application. Another great example is Distance Learning Information Technology (DLIT), a Thailand’s education transformation project under Ministry of Education, by using communications technology to disseminate education opportunity to all Thais. Teachers and students can access the produced online media anywhere, anytime from their mobile phones, tablets and computers. Our Company has pride in creating and providing these digital media services for our Clients. They also align with our philosophy in creating shared value for the society.

In sum, the Knowledge Communication Strategy, both related to the core businesses and related to the new businesses, created total revenue of 269 million THB, increased by 245% from the previous year. These figures imply social needs and signify a robust growth potential for our high-value business.

PICO (Thailand) strongly believes that our Core Competency Strategy and Knowledge Communication Strategy are supporting one another in strengthening the Company’s expertise. We will continue to create innovations in response to our Clients’ needs across industries, to generate higher profits and to sustain the success for our business, society and country.

The Company Secretary asked the shareholders whether there was any proposal or query.

A proxy holder of Thai Investors Association, Mr. Adirek Pipat-pattama asked :

1. From the report of board of directors which said that Distance Learning Information Technology (DLIT), a project under Ministry of Education, has disseminated education opportunity to all Thais, could you please explain how the Company has contributed to disseminate education opportunity to Thai people? And what is the result of such contribution so far?

Mr. Silchai Kiatpapan : Distance Learning Information Technology (DLIT) is the extension of the Royal initiative’s Distance Learning Television (DLTV). DLIT has contributed in disseminating education opportunity to all Thais in that it is the resource center of the digital content of a variety of learning and teaching approaches from the model schools, which can be accessed by all schools and teachers nationwide including the schools in remote areas. In the aspect of DLTV, which is one-way communication, the students in the remote area do not have opportunity to study the subjects that their teachers are not expert. DLIT is the key to solve this problem as DLIT is the two-way communication. Teachers can download the content or video to learn the learning and teaching approaches and if they have any questions, they can send their questions to DLIT’s resource center which can give them the answer and feedback. As a result, this has eliminated the limitation of distance and timing for all teachers and schools nationwide as they can access to the valuable resources from anywhere and anytime via DLIT’s multiple platforms e.g. mobile phones, tablets and computers.

When there were no additional questions, the meeting was deemed to acknowledge the Report of Board of Directors and Company’s operation results for 2015.

The Company Secretary asked the shareholders whether there was any proposal or query.

A proxy holder of Thai Investors Association, Mr. Adirek Pipat-pattama asked :

1. Does 2010 Media Co., Ltd. and GKE Joint Venture Co., Ltd. that the Company acquired generate revenue for the Company immediately once purchasing?

The Company Secretary : Those companies have the contract of museum exhibition fabrication with a government organization. However, they need our knowledge and source of fund to operate the big project. This acquisition is the connected transaction as 2010 Media Co., Ltd. is the parent company of GKE Joint Venture Co., Ltd. Such companies have already started to recognize revenue.

A shareholder, Mr. Hang-Chai Akkawasakul asked :

1. In the annual report page 87 and 88 (statement of cash flow), as shown in the consolidated financial statement, could you please explain why the profit before tax has significantly increased from Baht 1.5 million in the prior year to Baht 86 million, what is loss from sale of investment amounting to Baht 1.2 million and why the gross amount due from customers for contract work and trade accounts payable and other payables increased significantly from the prior year?

The Company Secretary : Significant increase in profit before tax was mainly due to the fact that last year the political uncertainty affected all the businesses in the market including the subsidiaries of the Company. As a result, almost all subsidiaries of the Company had net loss in the prior year. It can be seen from financial statement that in 2014 there was profit before tax in separate financial statement amounting to Baht 36 million while there was only profit before tax of Baht 1.5 million in the consolidated financial statement due to loss of subsidiaries.

Loss from sale of investment amounting to Baht 1.2 million was from the sales of an investment held by a subsidiary of the Company which has stopped its operation so loss from sales of investment was recorded in such subsidiary's financial statement.

Gross amount due from customers for contract work increased due to the increase of accrued income of which the Company already delivered the services and recognized the revenue according to Thai Accounting Standards but not yet issued the invoice to customers. While trade accounts payable and other payables increased significantly from the prior year due to the increased sales volume at the end of fiscal year that the Company has not yet paid the cost to suppliers. Such payables balance can be up and down in accordance with the movement of sales volume during the period.

A shareholder, Mr. Surin Banyongpongler asked :

1. In the statement of comprehensive income, the Company had total revenue of Baht 1,032 million, net profit % of approximately 5% or Baht 58 million which included dividend income of Baht 20 million. Would the Company be able to increase the net profit % to be higher than 5%? And what is the Company's plan to build the growth of its share price?

The Company Secretary : Normally, making the highest % net profit of the Company is the primary responsibility of management. Regarding the Company's share price, it depends on the operating results of the Company. Shareholders and investors should consider the long-term operating results together with those of companies in the same industry. In addition, there are a lot of factors that affect the share price.

2. Could you explain more about doing the best in running the Company's business?

The Company Secretary : The business has changed all the time, the Company thus has a variety of businesses including Meeting, Incentive, Convention and Exhibition Management & Service, Event Marketing and Digital Media and Content. The Company has always tried to expand the business as much as we can. During each year there are many factors that impact to the Company's business. For example, last year the political uncertainty was the uncontrollable factor, but the Company's management had tried our best to sustain and make the most of the business.

3. What is the revenue forecast in each quarter of 2016?

The Company Secretary : It is the Company's management to do our best in running the Company's business.

4. Regarding Rama IX Museum project, of which total project value is Baht 1,061 million, could you explain the revenue recognition of this project?

The Company Secretary : Regarding the museum business, according to the annual report 2015, as at October 31, 2015, the company has work in progress totaling Baht 1,214 million of which is Meeting, Incentive, Convention, and Exhibition (MICE) Management & Services and Event Marketing of Baht 270 million and Knowledge Communication of Baht 944 million.

According to the Public Limited Companies Act B.E. 2535 (A.D. 1992) (including the amendments thereto), shareholders representing not less than one-third in aggregate of the outstanding shares may request the meeting to consider any other matters than those specified in the notice for the meeting.

No shareholder proposed any additional agenda.

The Company Secretary asked the shareholders whether there was any other proposal or query.

A proxy holder of Thai Investors Association, Mr. Adirek Pipat-pattama asked :

1. Regarding the agenda of Other business, I would like to propose the Company to stipulate that new proposed agenda in the shareholders meeting must not be the agenda for consideration or approval. It should be just the agenda for discussion. This is to protect the right of shareholders who have not attended the shareholders meeting to promote the good corporate governance.

The Company Secretary : “Other business” is included in the agenda pursuant to the Public Limited Companies Act B.E.2535 (including its amendments). Additionally, in this agenda we are open to all questions from shareholders.

A Shareholder, Mr. Surin Banyongpongler asked :

1. Do the Company consider that the uncertainty of current global economy would have an impact to the Company’s business? And what is the business direction of the Company in 2016?

Mr. Silchai Kiatpapan : Normally, doing business always has risks. Some risks are controllable. For the uncontrollable risks, the Company promptly has the business plan to manage with them. In 2016, it is expected that risk from macro sector would continually exist. In 2015, for instance, macro factor, e.g. the terrorism, had indirect impact to the macro economy. While in 2016, it would be the direct impact to the macro economy according to the reports from many organizations which have predicted that the financial crisis may be approaching. This is not the risk that the Company can manage. Thus the Company develops risk management plan which is expanding our business into various businesses. And in each business, the Company has developed the long-term strategy for the sustainable growth. Consequently, if any business is affected from the crisis, the remaining businesses shall be able to operate. However, if the crisis has affected to all businesses of the Company, we also have the plan to cope with such a situation by maintaining minimum sales to cover the cost of business operation.

However, it is believed that the situation in 2016 would not be worse than a few years ago which Thailand political uncertainty had direct impact to the Company’s business. This year the impact from the world economy may affect the Company in that our clients, who are the multinational corporation, may reduce their marketing budget. Nevertheless, this impact can usually be foreseen by the Company because the Company usually plans the business together with the clients in years ahead. So we will receive the warning signal in case any unusual situation is going to occur. So far we have not yet received the warning signal of any serious situations affecting the Company business in the next 6 months.

A proxy holder of Thai Investors Association, Mr. Adirek Pipat-pattama asked :

1. Currently, the Bank of Thailand has announced that Thailand GDP will not significantly grow. Additionally, a lot of Thai companies has started running business in the neighboring countries. In term of Pico, is there any opportunities for the Company to run the business in our neighboring countries?

Mr. Silchai Kiatpapan : Currently the Company has the global network of Pico Group. And we have been doing the business in our neighboring countries, for instance, when our clients have expanded their business to other countries. However, the Company have not highlighted the revenue from this part due to its insignificant amount. In term of Republic of the Union of the Myanmar, the business volume will be significant when the new government is completely formed. So do the business in Kingdom of Cambodia which need to wait for the new government. The event marketing business mentioned above, we refer to the event marketing that relates to the real sector not the entertainment since we consider that the event marketing related to entertainment has a lot of variable factors and high risk. In conclusion, the opportunities of doing business in neighboring countries do exist but it has not been significant for the current Company business.

When there was no other consideration and query by the shareholders, the Company Secretary invited Mr. Chia Song Heng, the Chair to adjourn the meeting.

The meeting was adjourned at 11.30 a.m.

Signed.....Chairman
